**2010 Tyson-Stevenson Sewer Project Design /Build Project**

Regarding property located at: \_\_\_\_\_

Please be advised Sandpiper Contracting LLP / McElhanney Engineering Services Ltd. Design Build Team has been appointed by the City of Chilliwack to commence design and construction of sanitary sewer in your area. This includes construction of the gravity sewer mains and manholes on the roads within the service area as well as installing service connections up to the property line.

To help you identify the location of your sanitary sewer service connection, we will mark the location with either a wooden stake, if the connection is within the boulevard / grass area, or a nail complete with a pink flag if the connection is within your driveway. If you agree with the proposed service location **please sign below and return this letter to our office on or before May 27, 2010.**

If you prefer your service connection to be moved to a different location, please indicate on the drawing on the back of this sheet. Please indicate the **direction and distance in feet from the stake or flag** you would like the service connection moved. Again, **please sign below and return this letter to our office on or before May 27, 2010.**

It is Sandpiper Contracting LLP/McElhanney Engineering Services Ltd's intention to complete this project in a resident friendly manner and appreciate your cooperation towards meeting that goal. If you have any questions please call Rino @ Sandpiper 1-888-718-8484 or the City of Chilliwack project manager, Wil Wedel at 604 793-2763.

Thank you,  
Sandpiper Contracting LLP  
Rino DiNicolo, Senior Project Manager
